Driving licence – A, B

profile

Software engineer with 5 years of commercial experience in the UK and Hungary, specialising in Angular and TypeScript. I have delivered enterprise web applications for telecom and financial clients – from building new applications from scratch to modernising legacy systems – in both small and large teams. I enjoy owning features end to end, from UI design to production, and I am just as comfortable implementing a designer's work pixel-perfectly. I care about clean, maintainable code and visually appealing interfaces that are a pleasure to use.

experience

Career break
Dec 2025 – present

Planned year off. Built personal projects with AI-assisted development and kept my frontend skills up-to-date.

Senior Software Engineer
Oct 2025 – Dec 2025

Diligent · Budapest, Hungary

Built the Angular frontend of an LLM-powered AI chat application with an integrated AI agent, delivering a responsive and intuitive chat experience.

Angular Developer
Jan 2024 – Aug 2025

United Consult · Budapest, Hungary

Consultancy work on client projects in the banking sector. Modernised legacy desktop software into Angular web applications, built data-heavy list and form views, and worked on-site in cross-functional agile teams. Also built the Angular interface of a talking fortune-telling machine running on a Raspberry Pi.

Frontend Developer
Feb 2020 – May 2023

ANS Digital Transformation · Fareham, United Kingdom

Built and maintained Angular applications for telecom client, including scheduling and admin tools used daily by operations teams. Designed and implemented user interfaces end to end, agreed data models and APIs with backend developers, and created internal tools and the company website.

Earlier experience

Court Administrator, England (MSc completed alongside)
